  - Can bus interface with reverse function
  - Brake activated (on / off)
  - Brake activated with reverse function
- 
- All of the above can be fitted with or without the Green Tact Switch

---

**BROWN wire – Reverse Function**

- Stays on the duration of the 12v reverse feed
- **Take the vehicle out of reverse, the system will remain on for 15 seconds.**
- **If the system detects an object in the 15 seconds timer, it will remain on, when the object has moved the 15 second timer will restart from this point.**

**YELLOW wire – Foot Brake – Rocker Switch or Can bus Unit.**

- The system stays on for the duration of a 12v feed from the Foot brake, Rocker Switch or can bus unit.
- the unit will not be active unless it has a 12v feed

**GREEN Tact switch**

- **A short quick press of this button activates the system for 30 seconds**
- **If it detects an object the system will remain on until the objects moved, the 30 timer will activate once the object has cleared.**
- If you press and hold the button for 5 seconds the unit will switch off **(only applies to all items in blue bold text)**
